

# Model 1-CLIP

## 1-CLIP Single-Ear Stereo Earphone Suitable for Either the LEFT or RIGHT Ear

UTILIZES 1-BUD TECHNOLOGY TO MIX BOTH AUDIO CHANNELS TOGETHER

SKU# 1-CLIP

### FEATURING

- Single-Ear stereo earphone with 3-conductor 3.5mm stereo plug and 4-ft 11-in cord
- Uses patented 1-BUD® technology to mix both channels into the single earpiece
- A flexible silicone rubber loop fits behind either the Left or Right ear lobe to comfortably hold the earpiece in place on any ear
- The earpiece rests comfortably against the ear so this style of headphone can be used even if the user has a hearing aid in their ear
- This type of earphone might be considered a headphone for one ear and it is compatible with most stereo and mono audio devices, including the iPhone, iPad, iPod, most tablets, cell phones, laptops and MP3 Players
- The surface of the earpiece that rests against the ear has a soft flat felt-like pad
- The outer part of the earpiece is a soft rubber bulb

### GOOD TO WEAR WHILE LYING DOWN

- The style of the earpiece is ideally suited for those who might like to lie against a pillow while wearing the earphone on their ear
- The outer rubber surface is made of curved silicone rubber with a little pillow of air inside so it has the feel of a soft rubber ball
- The thin profile earpiece will not press into the ear and for that reason, it can actually be worn even with a hearing aid in place

### FEATURES

- Single-Ear stereo earphone combines the sound of both audio channels into one Earpiece
- Earphone has very strong audio with excellent overall sound range for music and voice
- Well suited for those who like to listen to talk radio or TV while lying in bed
- Comfortable to wear for long periods
- Easily suited to wear on either the LEFT or RIGHT
- Gold-plated plug to optimize the audio connection to your TV, Radio, iPod, iPad or other audio source
- Durable high-quality earphone is made to last
- Soft, flexible cord has a 3.5mm straight plug to fit nearly all kinds of audio devices

### COMPATIBILITY

- Well suited for use with all types of audio devices, including most Television Sets that have a 3.5mm standard stereo jack.
- Easily plugs into most radios, Kindle readers, cellular phones, tablets, MP3 players and virtually all types of audio equipment that accept a standard 3.5mm (1/8-inch) headset plug
- Cord is durably made for regular use on a daily basis
- Can be used while lying down, walking, standing, running or just relaxing outdoors
- Those individuals who find it hard to keep an earphone in their ear or don't like the earpiece to go down into their ear canal truly appreciate this earphone
