

Model RBUD3

Right-BUD SINGLE-EAR STEREO EARPHONE

Our Right-BUD earphone uses patented 1-BUD technology to combine the sound from the left and right stereo audio channels. Now you can enjoy hearing all the music with one earpiece and you'll never miss a beat.

The 3.5mm 3-conductor stereo plug is compatible with both Stereo and Mono audio devices including most MP3 players, Tablets and Assistive Listening Devices.

The Right-BUD-Pro is made of a soft silicone rubber material that curves around the ear to comfortably hold the earphone in place as you move about. The flat earpiece rests inside the ear but does not go down into the ear canal.

This earphone is popular with those who have a hearing loss in one ear and those who like the ability to keep one ear open to their surroundings while listening to music.

SKU# RBUD3

PACKAGE SET INCLUDES:

- Right-BUD-Pro Earphone

Earpiece is made of flexible, soft silicone rubber material, contoured to fit most all ear sizes.

Earbud shape is made to fit only in the Right Ear.

Great for individuals with Single Sided Deafness or Hearing Issues that wish to hear the combined stereo sound from the left and right channels of their audio device in a single earpiece that fits in the right ear.
